PROFESSIONAL QUALIFICATIONS

Mr. Crylen brings over three decades of commercial, retail, and industrial development experience to G23. As a seasoned design and construction professional, he has led a plethora of highly sophisticated and diverse real estate initiatives throughout the United States and abroad. In lieu of taking a “one size fits all” approach to design management, Tom specializes in ensuring that architect, engineer, and builder work creatively, efficiently, and most important, cohesively to realize each client’s specific requirements. Tom attributes his keen ability to tailor these processes successfully by having been continually challenged from within the most entrepreneurial to the most structured corporate environments.

PROFESSIONAL AFFILIATIONS OR ACCREDITATIONS

In addition to currently overseeing the architecture and engineering disciplines for G23, Tom also lectures graduate students at Northwestern University in Evanston, and has maintained membership in several other professional organizations including various Chicago Development Council Best Practices and Self-Certification subcommittees. Through his leadership, Tom remains committed to furthering his unwavering passion for excellence and client satisfaction well into the new millennium.

EDUCATION

Mr. Crylen graduated with honors from both the University of Illinois at Chicago School of Architecture, Art, and Urban Planning, where he completed his undergraduate work, and the Northwestern University McCormick School of Engineering in Evanston, where he obtained his Master’s degree. Tom is also a major proponent of continual learning, and regularly encourages his staff to participate in ongoing industry-related training to not only enhance their own formal education, but their ongoing contribution to G23 as a whole.
